

The right tools for teachers

WizTeach®, by Qwizdom®, a solution for educators that compliments the use of ēno™ and all other PolyVision interactive whiteboards and slates.

Addressing a wide variety of learning needs across a spectrum of subjects, teachers can select as few or as many WizTeach tools to display on-screen at any one time. Annotate, draw and explain a concept while working directly inside your web browser or other software application; or alongside your existing interactive whiteboard software.

WizTeach offers interactive learning objects to enhance and develop your students' learning experience. Engage students to help explain

mathematical concepts using WizTeach Numbers Tools; show weather patterns and maps; reveal word roots and word formation with WizTeach Literary Tools; or play a learning game with WizTeach Games.

Features

- Sleek in design, easy to use, highly interactive teaching tools
- Can be used with your existing software, websites or any other third-party curriculum or content software
- Provides flexible, floating tools that can be used to save and store lessons or used spontaneously

WizTeach offers interactive learning objects to enhance and develop students' learning experience.
